EDUCATION

UNIVERSITY OF CHICAGO

Master of Science in Computer Science | Expected 2027

- Specialization: High Performance Computing
- Coursework: Discrete Mathematics, Python for Data Science, Algorithms, Databases

UNIVERSITY OF MICHIGAN

Bachelor of Business Administration | 2016–2020

Stephen M. Ross School of Business

- Specializations: Financial Markets, Entrepreneurial Law

EXPERIENCE

BENZINGA

Chief of Staff | 2023–2025

- **Predictive Analytics:** Developed ML models in Python and Tableau dashboards to predict churn with 85% accuracy, increasing CLV by 20% and directly quantifying and mitigating attrition risk for a core business vertical.
- **Product Innovation:** Led the end-to-end development and launch of a high-revenue mining product, generating \$500,000+ since inception while engineering technical workflows, market risk, and product-market fit.
- **Algorithm Development:** Engineered factor-based models for Benzinga Quant to analyze market volatility and rank high-probability stocks using quantitative signals, technical indicators, and sentiment analysis.
- **Growth Operations:** Launched and scaled the Virtual Events vertical to drive \$350,000+ in 2024 revenue, leveraging cross-functional leadership and analytics to optimize pricing and accelerate customer acquisition.
- **Strategic Marketing:** Optimized mobile app product and marketing strategy by creating attribution models and multivariate testing frameworks, resulting in a 33% reduction in CAC and a 20% increase in conversion rates.
- **Strategic Planning:** Evaluated M&A opportunities and partnerships under the COO, developing complex growth forecasts for presentation to our largest shareholder, Beringer Capital, to scale global operations and hiring.

JUMPSTART HEALTH INVESTORS

Investment Associate | 2022–2023

- **Due Diligence:** Evaluated 200+ potential investment opportunities, performing rigorous risk assessments of business models and presenting detailed investment memos to the Investment Committee.
- **Portfolio Strategy:** Leveraged historical investment data to derive actionable insights, shaping future fund deployment strategies and downside protection frameworks to improve long-term fund performance.
- **Market Research:** Conducted exhaustive industry research and direct engagement with entrepreneurs to identify market trends and potential systemic risks within the healthcare startup ecosystem.
- **Strategic Advisory:** Provided invaluable support to portfolio company management teams by evaluating strategic initiatives and refining fundraising strategies to optimize business and product growth.
- **Stakeholder Management:** Cultivated and nurtured relationships with a diverse array of stakeholders, including venture capitalists and executives, to facilitate high-level networking and deal flow.

WELLNEST

Co-Founder & Chief Operating Officer | 2019–2022

- **Fundraising:** Successfully raised \$800,000 in pre-seed funding from top-tier venture capital firms and angel investors to develop a novel consumer mental health application.
- **Strategic Partnerships:** Forged and managed institutional partnerships with the University of Pennsylvania and Boston University, leveraging their networks to establish sustainable and lucrative revenue streams.
- **Product Strategy:** Pioneered product management initiatives, strategically integrating game design to reduce time-to-value for mindfulness routines while maintaining a perfect 5.0-star App Store rating.
- **Business Operations:** Ideated and executed growth and monetization strategies, driving the successful expansion of Wellnest's mission and garnering acclaim from Morning Brew and TechCrunch.

SKILLS

- **Programming:** Python (NumPy, Pandas, Scikit-learn, SciPy, Matplotlib), C++, SQL, Unix/Linux, Git
- **Data/Finance:** Financial Modeling, Quantitative Risk Management (VaR, Stress Testing), Tableau, Factor-based Modeling, Derivatives Pricing (Greeks), M&A Due Diligence, Multivariate Testing, Time-Series Analysis
